Communicate and collaborate with

PlaceCam V2

videoconferencing software

PlaceCam V2 offers you the perfect software for videoconferencing, business-TV, e-Learning and related applications.

You can collaborate effortlessly from your desktop by video conference with your partners. PlaceCam V2 supports all IP based transmission-media from the internal company network up to distributed meetings over heterogeneous networks.

To call and invite someone into a conference is extremely easy since all you need to type is the email addresses of your partners who have PlaceCam V2 installed on their computer.

The application sharing integrated in PlaceCam V2 allows Moderators to transfer any Windows application to all other participants. Thus all conferees can see and moderators can control the shared applications.

Scenarios

Team Work / Project Work

When your project partners work at different locations, or you have branch offices, PlaceCam V2 enables you to realize your project consultations jointly. For instance, you can share PowerPoint slides or Excel worksheets for demonstrations and collaborative work with the other participants.

You don't only save time....you also save money!!

Applications

Network Technology

Through our leading Emulated Multicast technology, PlaceCam V2 is capable of managing multipoint video conference without a central Multi Conference Unit. A moderator can hold a session with up to 100 participants.

eLearning or Corporate Information Exchange

The use of a video conferencing software can increase the effectiveness of education on the job and can reduce overall travel time.
